

SAFETY RELIEF VALVES

Introduction

Inta's WRAS* approved and CPR compliant safety relief valves have been designed to protect closed circuit water heating systems from over pressure which can build up as a consequence of heating the water or any other fault conditions resulting in excessive pressure. Available with 1/2" or 3/4" connections and a range of pre-set discharge.

- Prevents damage to heating systems by relieving excess pressure
- Range of factory set discharge pressures available
